

## Push API Lead Documentation

[Overview](#)

[API Payload Details](#)

[Header Details](#)

[Needed Detail](#)

### Overview:

This document contains details of the WhatsApp lead payload to be sent through to your Push API endpoint and other details that may be needed.

### API Payload Details:

Unset

```
{
  'id': <chat_id>,
  'enquirer': {
    'name': <sender_name>,
    'phone_number': <sender_number>,
    'contact_link':
'https://dubai.dubizzle.com/svc/chat/whatsapp/api/v1/chat/property/1234566789'
  },
  'listing': {
    'url': <listing_url>,
    'reference': <listing_reference>,
  },
  'received_at': <received_at_timestamp>,
}
```

## Header Details:

The header “X-dubizzle-Signature” Is created with the below formula to help validate the authenticity of the payload -

```
md5($secret_key . $body, false)
```

Where, “\$secret\_key” will be provided by us once we register your API endpoint in our system and “\$body” is the whole payload.

## Needed Detail:

To complete the API integration provide the specific API Endpoint URL where you wish to receive the data to [ps-reply@dubizzle.com](mailto:ps-reply@dubizzle.com).
