VAT represents an indirect tax applied to the consumption of goods and services at each transaction point. This cost is ultimately carried by the end-consumer. Businesses and entities act as collectors, gathering VAT on behalf of the government. Since the introduction of VAT in the UAE on January 1, 2018, consumers are expected to pay 5 percent for the products or services they utilize. Accessing appropriate VAT services in the UAE allows for effective management of your business's VAT components. Registration under UAE VAT law signifies official recognition by the government. Engaging with a VAT service provider in the UAE streamlines all VAT-related processes, ensuring compliance with Emirati VAT laws and regulations for your business.
